## QATAR ACADEMY FOR SCIENCE & TECHNOLOGY

4th October 2019

# NEWSQAST

We are now finished with the student MAP testing and assessments. We are seeing some amazing behavior at school when it comes to friendliness, the students are socializing well with each other and a major factor in this is your support of our no-phone policy in school. We continue to encourage you to monitor your students progress on their dashboards and give us feedback as needed. It is a new system that we have developed and we need to know the effectiveness of the system for the parents.

**Sam Abrams, Principal of QAST**

### Innovations

As part of their project on innovation, Grade 9 students visited the National Library to use the video editing suite. They worked in teams to record a short video based on innovations within a Muslim context.

Students learnt how to use green-screen techniques, basic video editing and brought their stories to life.
